SMART AESTHETICS

A cosy and tidy-looking bathroom:
Zehnder Deseo Verso

DESIGN PLUS

powered by: **ISH**

Exceptional comfort, modern design and outstanding functionality: Zehnder Deseo Verso

The elegant glass front of Zehnder Deseo Verso fits perfectly into all kinds of bathroom designs and makes this decorative radiator an eye-catching feature, while also providing a cosy source of heat. Additional special features for users include up to two extendable towel rails which can be mounted on the back of the radiator. This allows the towels to disappear behind the glass front and keeps the bathroom looking neat and tidy.

A tidy bathroom

The towels disappear behind the glass front

Extendable towel rail

Convenient push-to-open and push-to-close function making it easy to hang towels on the rail

Grab function

Forward facing lug making the towel rail easy to pull out

Outstanding flexibility

Even during installation, customers can still choose whether the towel rail should extend to the left or right

Pleasant warmed towels

By all-over heat distribution on the back of the decorative radiator

Convenient operation

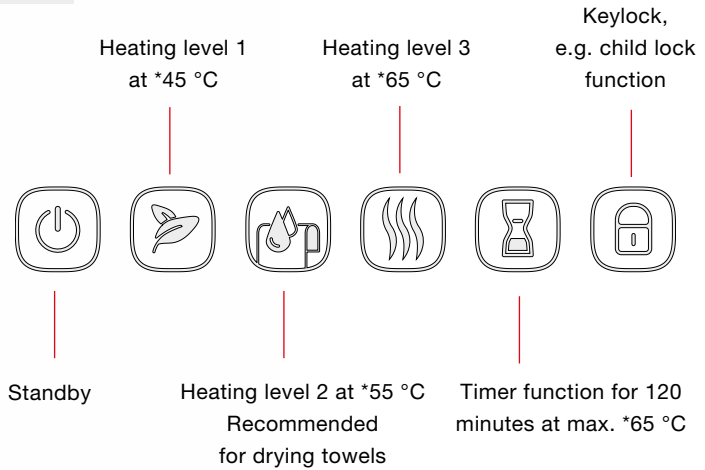

Minimalist, contemporary design
that adds an elegant touch to the bathroom

Comfortable level of warmth
in next to no time with its state-of-the-art infrared technology

Easy to clean
the smooth glass front, ensuring optimum hygiene in humid bathroom environments

Elegant heated glass front
available in gloss black or white

Control panel

* Surface temperature of

Remote control

Additional functions such as frost protection and daily & weekly programme
