ZEHNDER ARCHIBALD

Always at your service. This unique decorative radiator is both elegant and highly functional. Zehnder Archibald from the Studio Collection is the perfect practical bathroom accessory, offering indulgently warm towels and creating a pleasant, comfortable indoor climate. Seamlessly formed from a single curved steel tube, the shape is as striking as the construction is unique. With Zehnder Archibald, designer Leo Salzedo has created a stylish and contemporary room feature that combines functionality with distinctive design.

Operation on central heating system

Seamlessly formed from a single curved steel tube, the shape is as striking as the construction is unique. Zehnder Archibald from the Studio Collection creates a stylish and contemporary room feature that combines functionality with distinctive design. Its space-saving design can hold up to four towels, which can be heated simultaneously. Round tubes Ø 25 mm made of steel.

Thermal outputs to EN 442, with CE marking. Standard 2 x 1/2" with female thread, flow/return installed with left-hand or right-hand option, at the bottom horizontal facing inwards, 1/4" vent at the top facing the rear. Ideal with valve unit and return screw connection in an angle-angle design.

Radiator with powder coating, in the colour RAL 9016 as standard, in a special colour or in chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.

Electric operation

Seamlessly formed from a single curved steel tube, the shape is as striking as the construction is unique. Zehnder Archibald creates a stylish and contemporary room feature that combines high functionality with distinctive design. Its space-saving design can hold up to four towels, which can be heated simultaneously.

Round tubes Ø 25 mm made of steel. With integrated electric heating element, degree of protection IP44 (splash-proof), for mains power supply of 230 V. With connection cable 1.2 m in length with two pin plug. White cable, plug and cable cover; chrome radiators have a grey cable and plug with a chrome cable cover. Decorative radiator filled with heat transfer fluid. The electric heating element does not have any operating options. The control has to be planned and executed on site.

Radiator with powder coating, in colour RAL 9016 as standard, in special colour or chrome on request. Delivered ready to install with matching wall brackets in colour of radiator.
